

invisalign® first

WALTON & MAREADY
ORTHODONTICS

➤ **The first step toward
their best smile.**

Advantages of Phase 1 treatment.

The goal of Phase 1 treatment is to develop young jaws and/or arches to make room for existing teeth and for incoming permanent teeth.

- Can prevent pre-existing bite issues from getting worse
- Can fix existing teeth straightening conditions
- Can improve the appearance of a growing child's smile
- Can correct oral habits such as thumb sucking or tongue thrusting
- Can make Phase 2 treatment shorter and easier

Typically, Phase 1 treatment is addressed with traditional appliances. Thanks to the latest innovation in Invisalign® technology, you now have more treatment options.

Introducing Invisalign

Our clear aligner treatment is clear and a positive experience while growing children – aligning their teeth and making room for existing teeth.

gn[®] **First treatment.**

designed for predictable results
addressing the unique needs of
teeth while expanding their arches
with and incoming permanent teeth.

Little smiles deserve a treatment designed just for them.

A simple start.

Invisalign® First treatment starts with a simple scan or impressions. From there, every step of your child's plan is digitally plotted, so you know what to expect. Plus, your orthodontic insurance may cover up to 50% of treatment cost.*

A happier experience.

Removable aligners mean there's little interruption to your child's life and the foods they love. Plus, the aligners are specifically designed to fit smaller teeth and with space to accommodate teeth that are growing in.

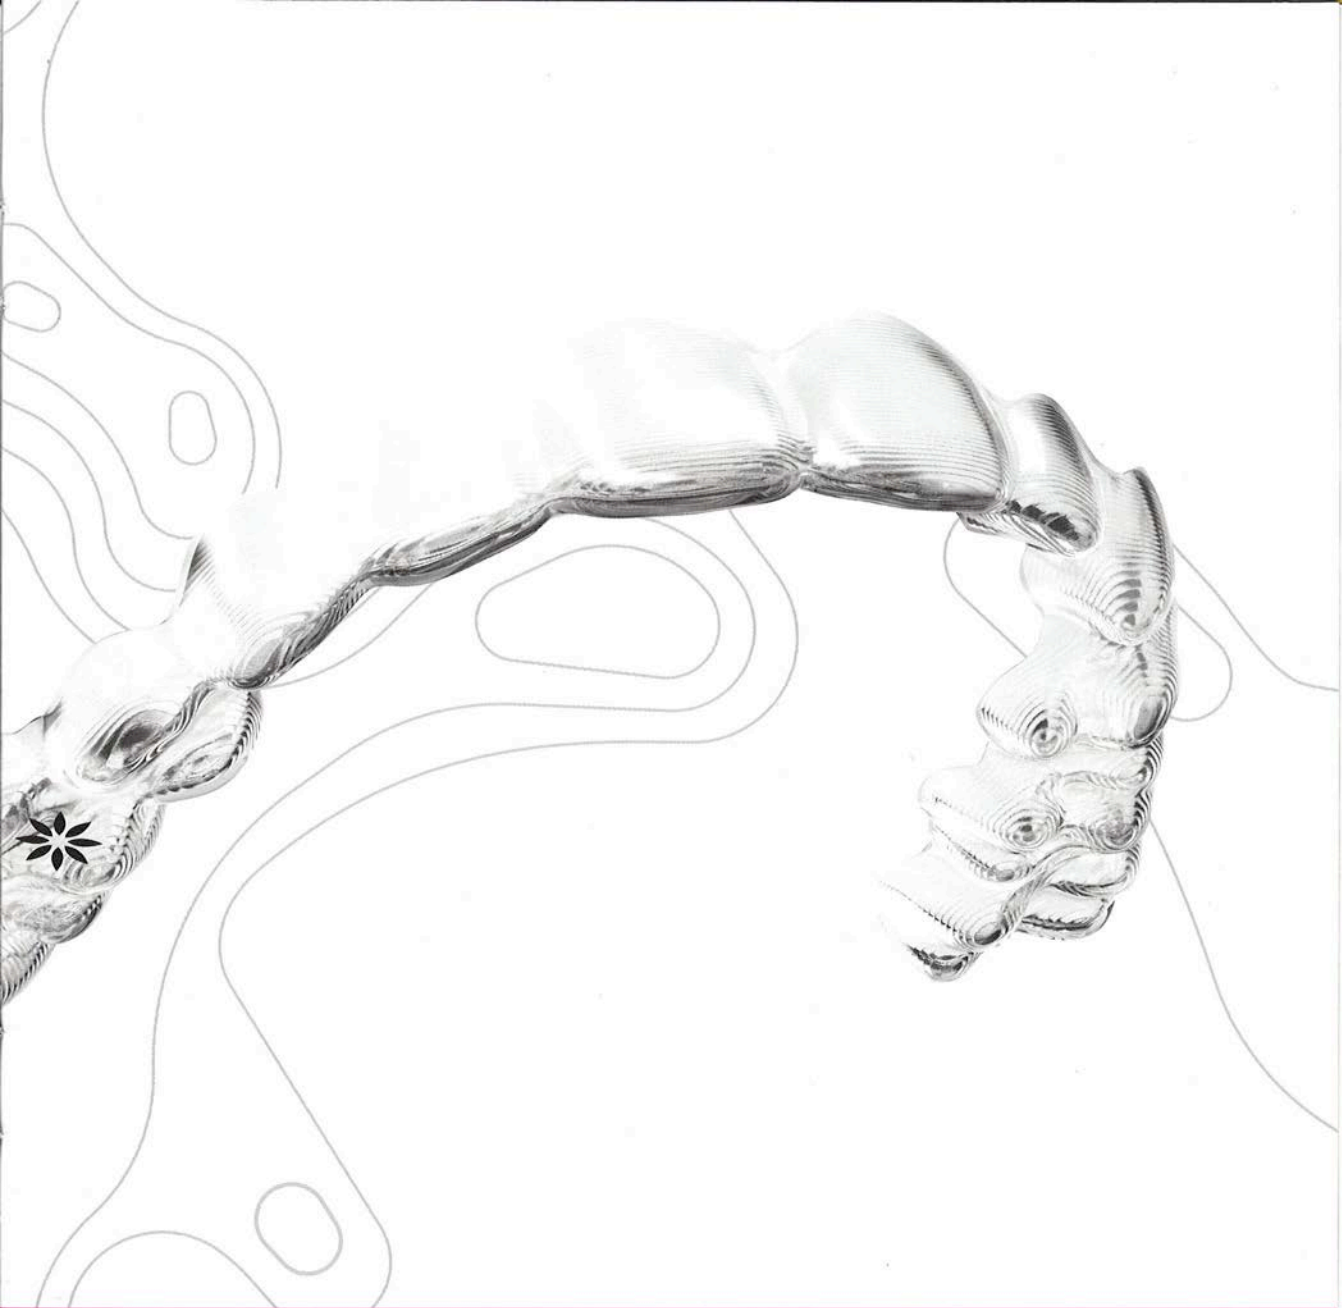

A bigger smile.

As they progress through their treatment, you'll see their smile transform through a series of small, expertly designed shifts calculated for how little teeth should move.

*Many dental insurance plans cover Invisalign treatment just as they would other orthodontic treatments. Ask your doctor about how to use your orthodontic insurance coverage to pay for Invisalign treatment.

Made for all sorts of smiles.

Invisalign® First clear aligners can fix a broad range of teeth straightening issues, including crowding, spacing, and narrow dental arches.

No food restrictions.

With Invisalign First clear aligners, there's no missing out on popcorn at the movies. Children can continue to eat what they want.

No change to hygiene routine.

Growing children can continue to brush and floss without hassle, keeping their good hygiene habits on track.

Proven smile-changing power.

When your child gets Invisalign treatment, they're in great company. Invisalign technology has transformed over 5 million smiles worldwide.

Turn their little smile into a big, beautiful one. Speak to your doctor today about Invisalign First treatment.
